

When you're a victim of a Ransomware Attack, And your phone is locked... NOW WHAT?

The average person uses their mobile phone 80 X per day.

Can you Afford to Lose Connection?

Think about all of the tasks you perform on your phone every day. From connecting in business, to communicating with your family, our phones have quickly become an indispensable tool. A ransomware attack that locks down your phone would be devastating to the average person.

You know how it feels when you can't find your phone and a wave of panic sets in? You're not alone. Now, imagine being completely locked out by Ransomware, unable to access your phone for days or even weeks. It's a nightmare scenario that's becoming increasingly common.

What if you Can't Afford the Ransom?

If you don't pay the ransom, everything you've ever typed or viewed on that device, even if it's been deleted, can be sent to your email contacts or posted on a public platform such as Facebook and LinkedIn.

ALERT: Almost all Americans have already been exposed in a data breach and since Ransomware does not discriminate, everyone is at risk. In fact, in just one recent breach in 2024, 2.9 billion social security numbers, addresses and passwords were exposed. [1]

SOLUTION

ACS Ransomware Protection Plan Includes: EndpointLock™ Keystroke Encryption and \$50,000 Ransomware Coverage

The ACS Ransomware Protection Plan safeguards your family's PC and mobile devices from keylogging spyware that can be leveraged to advance a Ransomware attack. Additionally, the plan will pay up to \$50,000 for a ransom demand and other associated costs.

Keystroke Encryption	\$50,000 Coverage*
<p>EndpointLock™ keystroke protection stops keylogging spyware that gets downloaded as part of a phishing attack and is often used as the first step to install Ransomware.</p> <ul style="list-style-type: none">• 256bit Military-Grade Encryption.• Compatible with Windows PC, Android and iOS mobile device• The App takes just minutes to download and install.• Protects seamlessly in the background as you type.• Includes Unlimited Dark Web Scanning built-in to the app.• EndpointLock covers up to 8 of your family devices.	<p>Cyber extortion occurs when someone accesses your personal data and threatens to share, destroy or restrict you from using your personal data or device unless you pay them a ransom .</p> <p>The plan will pay the resulting reasonable and necessary costs for:</p> <ol style="list-style-type: none">1. Money or digital currency paid as ransom.2. Fees you pay to hire professionals to help you handle the cyber extortion occurrence within one year after it begins: <ul style="list-style-type: none">• a digital forensic analyst to help with prosecution;• a cyber security consultant;• a reputation management firm• a lawyer for legal guidance.

Ransomware Targeting Consumers is on the Rise

Today, Ransomware attacks occur every 11 seconds and are showing 80% growth year over year. [2]

This is the only plan that protects your entire family*, including children away at school. By safeguarding all your household PC and mobile devices, you're protecting your family from the potentially devastating embarrassment and costs of a Ransomware attack.
